Question 3 on Farm Evaluation: Does your farm have the potential to discharge sediment to off-farm surface waters?

Question 3 on the Farm Evaluation is designed to identify fields that have the potential to discharge sediment or the potential for sediment erosion due to irrigation runoff and/or runoff during typical heavy rainfall events into streams or waterways.

If practices are in place to prevent sediment discharge/erosion, Question 3 should be answered "Yes" and the practices implemented should be recorded on Part D (Sediment & Erosion Control Practices) of the Farm Evaluation.

You will also need to record this information on the Sediment Discharge and Erosion Control Plan that must be certified and kept on farm.

If you misunderstood question 3 on the Farm Evaluation that you returned to the East San Joaquin Water Quality Coalition **AND** you incorrectly circled "Yes", please answer the questions below. Then sign the bottom, return to the Coalition, and keep a copy for your records. Once the Coalition receives this completed questionnaire, your answer to Question 3 will be updated to "No" based on this information.

Question 1: During an irrigation event, do the listed parcels have the potential to mobilize and/or erode sediment resulting in sediment discharge to nearby waterways when no sediment/erosion control practices are in place? YES NO

If No, list reason: _____

Question 2: During typical heavy rain events, do the listed parcels have the potential to mobilize and/or erode sediment resulting in sediment discharge to nearby waterways when no sediment/erosion control practices are in place? YES NO

If No, list reason: _____

If you answer "Yes" to any of the questions above, Question 3 on the Farm Evaluation should also remain "Yes" and there is no need to submit this form.

I certify that the parcels listed above do not have the potential to discharge sediment to nearby surface waters and I incorrectly answered "Yes" to Question 3 (Part A) of my Farm Evaluation. I request that my answer be changed to "No" for the reasons described above.
