

SECP Certification Contacts

The Sediment and Erosion Control Plan must adhere to site-specific recommendations provided by a listed agency (NRCS, UC Cooperative Extension, Resource Conservation District or County Ordinance applicable to sediment and erosion) **OR** be certified by a qualified professional possessing the required registrations or certifications and have appropriate experience with erosion issues on irrigated agricultural lands.

Qualified Professionals Include: Professional Civil Engineer, Professional Geologist, Professional Engineering Geologist Professional Landscape Architect, Professional Hydrologist, Certified Soil Scientist, Certified Professional in Erosion and Sediment Control, Certified Professional in Storm Water Quality, or Professional in Erosion and Sediment Control (see page 7 of the SECP template).

To assist growers with identifying professional with certifications that can complete a SECP, the East San Joaquin Water Quality Coalition has begun compiling a list of professionals who are Certified Professionals in Erosion and Sediment Control (CPESC) within the Coalition boundaries.
